ACCORD Four Enterprise - An ERP Solution

ACCORD Four Enterprise provides a comprehensive solution designed to help companies succeed in business by adopting strategic use of business information to gain competitive edge.

To meet expectations of stakeholders, employees, customers, suppliers, and others, a growing organization requires a comprehensive and integrated business information solution. ACCORD Four Enterprise is the best end to end comprehensive and integrated solution available today.

ACCORD Four Enterprise is designed to improve the efficiency across all departments of the enterprise. The solution "ACCORD Enterprise" allows the management to design and implement effective and strategic business decisions.

ACCORD Four Enterprise vanquishes the old standalone computer systems in Finance, HR, Manufacturing, Warehouse and replaces them with a single prolific enterprise resource solution comprising of Finance, Accounts Receivables, Accounts Payable, Human Resource, Materials Management, Production Planning, Business Intelligence, Supply Chain Management, etc modules. Deployment of E-Business strategies provides even more control of business processes.

ACCORD Four Enterprise is built on the state of the art n-tier architecture. The concept of "middle-tier components" brings in inherent robustness and scalability hence providing large variances to pick front-end tools and languages along with

It is multi-lingual, and comes from an highly evolved Product Suite which has already been translated into over 30 languages. Sold, installed and supported in 40 countries worldwide, it is designed to meet the Multi-Currency requirements of Global Corporations.

Huge business repertoire makes it a knowledge-base system for customer-centric approach and because it targets maximum returns on business investments, ACCORD Four Enterprise is a requirement for any futuristically aligned Business Entity.

Key Benefits of Accord Four Enterprise:

- Increases productivity and as well reduces costs
- Control of resources achieved centrally across the departments
- Enable organizations to minimize their investment in stock and depot resources whilst ensuring a high level of service
- Seamless integration with other enterprise systems and gives full control
- Equips enterprise and corporate bodies with instant decision making power though comprehensive MIS and budgetary, cash flow statements
- Completely modular in design and with profile based user configurations
- Active-management aspect enables to watch receivables closely, and act accordingly to improve bottom line.
